

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. EACH book is entered in the following Catalogue with its full title under the name of the author. In cases of joint authorship, the books appear under the name of each author, but new editions of books, although they may be edited by another, appear only under the name of the original author. Anonymous works are entered in full under the distinguishing word of the title.

Each book is also entered under the heading of the subject to which it chiefly relates—the title of the book, in this entry, being sometimes abridged. The entries under the subject-headings are arranged in chronological order, except in some instances where another arrangement has obvious advantages. Books which deal in the general sense with subjects such as 'Law' or 'Book-keeping' are entered under the corresponding general headings, but books which treat of special branches of these subjects, such as 'Bank Book-keeping' or 'Mercantile Law,' appear only under the appropriate special headings.

Only such Blue Books and Parliamentary Papers as are likely to remain of permanent interest have been included in the Catalogue. One or two Books, which are marked with an asterisk, are the property of the Edinburgh Chartered Accountants Students' Society.

12-2-559.10.5

A list of all books added to the Library will in future appear regularly in 'The Accountants' Magazine.' The present catalogue is issued with blank pages interleaved, so that it may be kept up to date by writing in the entries from the Magazine. A Cabinet containing a Card Catalogue has also been placed in the Library for reference. As cards are inserted whenever a new book is procured, a convenient and complete Catalogue is thus at all times available.

A list is appended to the Catalogue of periodical publications received regularly for the Reading-rooms.
